CERTIFICATES

corn grits

Type 98

CORN GRITS Our products, which are obtained from non-GMO corn with high nutritional value, are produced by considering all the steps and quality standards of modern production processes.

Type98 Corn Grit of Golden Semolina provides high industrial performance in the production of corn chips and many snacks.

corn grits

Type 101

Our products, which are obtained from non-GMO corn with high nutritional value, are produced by considering all the steps and quality standards of modern production processes.

Type101 Corn Grit of Golden Semolina provides high industrial performance in the production of breakfast cereal, snacks and pet food.

corn grits

Type 103

Our products, which are obtained from non-GMO corn with high nutritional value, are produced by considering all the steps and quality standards of modern production processes.

Type103 Corn Grit of Golden Semolina is used in the brewing industry with its low fat content and excellent carbohydrate levels. It has a high degree of purity, and the full particle size contributes to its excellent industrial performance in the hydrolysis process. It is a gluten-free supplement and therefore serves the growing gluten-free beer market.

corn grits

Type 108

Our products, which are obtained from non-GMO corn with high nutritional value, are produced by considering all the steps and quality standards of modern production processes.

Type108 Corn Grit of Golden Semolina provides high industrial performance in snack production. Well-ground corn is fine and smooth in particle and suitable for use in extruders. It is used in the production of corn chips, breakfast cereal, cereal products and is also preferred in the packaging sector.

corn flour

Our products, which are obtained from non-GMO corn with high nutritional value, are produced by considering all the steps and quality standards of modern production processes.

Apart from having excellent nutritional value, Corn Flour of Golden Semolina is bright yellow in color and is GMO-free. It has many application areas such as bakery products, sauces, usage with cereals, pasta production and packaging industry.

corn bran

Our products, which are obtained from non-GMO corn with high nutritional value, are produced by considering all the steps and quality standards of modern production processes.

Corn Bran of Golden Semolina contains high percentage of lipids, amino acids, proteins, minerals, fibers and is rich in energy. It is ideal for animal nutrition due to its high nutritional value and it guarantees health and weight gain for animals. It is a valuable basic material in the production of dairy cattle, beef cattle, poultry and many animal feeds.
